Cecil G. Davis, Assistant Commissioner

**A Message
from the
Commissioner**

Each year farmers, businessmen and investors make important decisions based on statistics provided through the efforts of state operations like the Alabama Crop and Livestock Reporting Service. These decisions, in turn, impact upon the lives of all consumers in our state and throughout the country.

The Alabama Crop and Livestock Reporting Service operates as a cooperative effort of the U.S. Department of Agriculture and the Alabama Department of Agriculture and Industries. There's also another important cooperative effort that must be recognized each year — that of Alabama farmers who contribute their time to answer surveys on which the essential reports issued by the Service are based.

You will find this year's *Alabama Agricultural Statistics* Bulletin particularly helpful because, in addition to the annual statistics provided, information on commodity production for the past six years also appears.

Albert McDonald

ALBERT McDONALD
Commissioner of Agriculture

FOREWORD

This annual bulletin is twenty-seven in a series dating back to 1948. This publication remains the most popular of our releases, based on subscriber requests. We have attempted to make these bulletins the most complete accumulation of current statistical data available relating to agriculture in Alabama. This issue contains the preliminary data series of state and county estimates for 1984 and comparable data for earlier years. Data for 1983 and earlier years have been revised in many instances and this published series should be used in lieu of any previously published data.

The estimates in this bulletin are developed primarily from sample surveys. In recent years we have come to rely heavily on a program of probability sampling, enumerative surveys, and objective yield measurements to support our old standby, the mail survey system. This was done to increase the precision of our estimates. The accuracy of our estimates is also linked closely to the degree of response. In Alabama the response to our surveys has been gratifying. I want to say a special thanks to the many Alabama farmers and agri-businessmen who assisted us by providing basic data about this state's agriculture. You may be assured we have kept our pledge of confidentiality of reported data.

Individual reports from farmers have been supplemented by those from the Alabama Cooperative Extension Service. In particular, income data at the county level comes from their contributions.

I also express my sincere appreciation to the staff of the Alabama Crop and Livestock Reporting Service for their continued efforts to provide quality statistics for the state of Alabama.

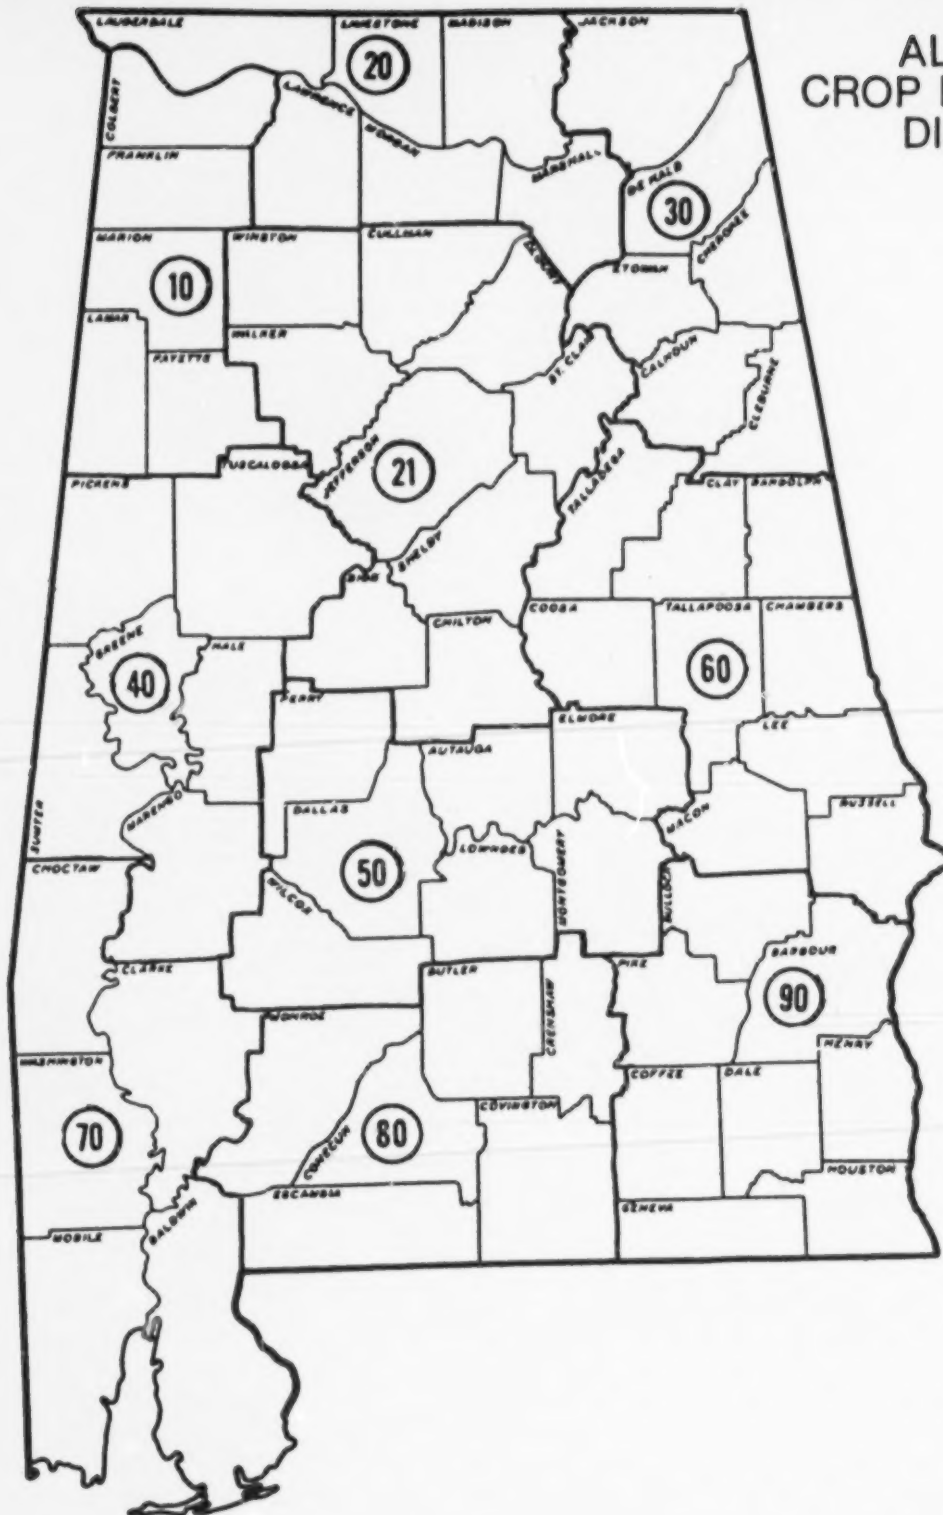

Sincerely,

Marshall L. Dantzler
State Statistician

CROPS REVIEW

1984

Clayton J. McDuffie

Acres harvested for corn, cotton, sorghum, and peanuts showed an increase from 1983, while soybean and wheat acreages declined. Alabama farmers harvested their crops from 3.66 million acres, compared with 3.53 in 1983 when acreages were reduced by the payment in kind (PIK) program.

Land preparation and most plantings were hampered by wet fields and rainy weather during February, March, and April. Peanut planting progressed at a regular pace while sorghum plantings were behind normal and corn and cotton were well behind normal planting progress. May's weather was more suitable to planting and cultivating, as crop progress became more typical and planting of the soybean crop was under way by the first of May.

Planting of corn, cotton, and peanuts was virtually complete by late May and wheat harvest began with excellent weather conditions. By mid-June soil moisture conditions were short over the entire state. Weather patterns remained the same through June and most of the major crops were considered in fair condition. Harvesting of the state's peach crop started in mid-May and concluded in August, producing an excellent crop. Pecans were not as fortunate as peaches, as production was well below normal.

Scattered rainfall began to occur during July and the state received heavy rains the end of the month and the first part of August. Temperatures for the month of July were well below normal. Crop conditions improved from fair in June to mostly good during July. Excellent growing conditions continued into August, improving crop conditions to mostly good resulting in normal crop development stages. Corn harvest was under way by early August in the Southern part of the state. Farmers began to harvest sorghum by mid-August and peanuts during the latter part of the month.

Farmers began land preparation in mid-September for fall plantings even though September was a dry month, and soil moisture was very short by the month's end. Cotton and soybean harvest began in late September as corn, sorghum, and peanut harvest progressed on schedule. Ideal harvesting conditions continued through October. The corn and record peanut crops were completely harvested by mid-October. Small grain acreage seeded was behind normal because of the dry conditions. Sorghum harvest was nearing completion by mid-November and most of the state's cotton crop had been harvested by the end of November. The state's soybean harvest was virtually complete by mid-December while planting of small grains gained momentum as moisture conditions improved. Fall seeding of crops was complete by mid-December, and small grains got off to a fast start as December temperatures were well above normal.

ALABAMA'S FIVE LEADING CROPS: ACREAGE, YIELD, PRODUCTION, AND VALUE, 1984

Crop	Unit	Harvested	Yield per Harvested Acre	Production	Value of Production
		1,000 Acres	Unit	1,000 Units	1,000 Dollars
Corn	Bu.	385	65	25,025	73,824
Cotton lint ^{1/}	Lb.	307	699	447	119,939 ^{2/}
Hay	Ton	680	2.00	1,360	84,320
Peanuts for nuts	Lb.	219	2,960	648,550	168,623
Soybeans for beans	Bu.	1,370	21	28,770	178,374

^{1/} Production in 480 pound net weight bales. ^{2/} Cottonseed would add \$15,200,000 to the value of production from the cotton crop.

LIVESTOCK REVIEW

1984

Robert L. Jefferson

Cattle Numbers Down 2 Percent: All cattle and calves in Alabama as of January 1, 1985, totaled 1,830,000 head. This is 2 percent below the January 1 inventory last year and 4 percent below the January 1, 1983, inventory. Classes were down from a year ago for beef cows, milk cows, steers 500 pounds or heavier, and calves under 500 pounds; while classes were up for heifers for beef cow replacements, other heifers 500 pounds or over, and bulls 500 pounds or over. All cows that have calved, at 920,000 head, were down 2 percent. Beef cows decreased 12,000 head, while milk cows were down 3,000 head. Heifers for beef cow replacements were up 4,000 head, while milk cow replacements remain the same as a year ago. Steers 500 pounds and over decreased 27 percent and calves under 500 pounds were down 6 percent. The 1984 calf crop was placed at 830,000 head, down 5 percent from 1983. Alabama ranked 22nd among states in all cattle, but 15th in the number of beef cows on farms.

Hogs: Alabama's December 1, 1984, hog and pig inventory was at a record low 360,000 head, 80,000 less than the previous low established in 1983. Breeding stock dropped to 56,000 head, compared to 75,000 head in 1983, while market hogs dropped 17 percent to 304,000 head. The 1984 pig crop totaled 625,000 head, down 20 percent from 1983. Pork producers farrowed 81,000 sows during 1984, down 21 percent from the previous year. Alabama ranked 21st among states in total hog numbers.

Milk Production Down: Alabama's dairymen produced an estimated 536 million pounds of milk during 1984, off 6 percent from the 573 million pounds during 1983. The annual average number of cows milked was 50,000 head, 3,000 below the 1983 average. Production per cow averaged 10,720 pounds for 1984.

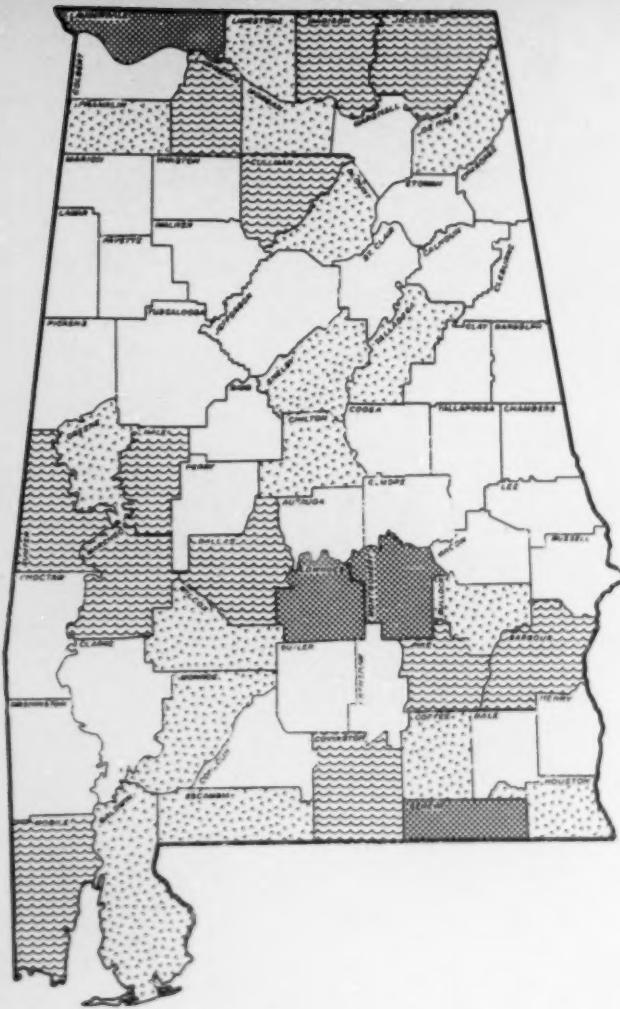

Red Meat Production: The 1984 production of red meat (beef, veal, pork, and mutton) in Alabama totaled 242.5 million pounds (dress weight). This was 5 percent less than the 1983 level. Cattle slaughter totaled 236,600 head, 7 percent below a year earlier. Calf slaughter totaled 2,900 head, 900 head less than the previous year. Hogs butchered, at 530,500 head, were up 1 percent.

CATTLE and CALVES

POULTRY REVIEW

1984

Forestine Herron

Broiler Production Up 4 Percent: Alabama broiler producers marketed 536.6 million birds in the 1984 marketing year, an increase of 20.9 million from the 515.7 million marketed in 1983. Alabama is the third largest broiler-producing state in the United States.

Egg Production Up 1 Percent: During 1984, Alabama's laying flocks produced 2,783 million eggs, down 30 million from the previous year. Hens and pullets of laying age on hand as of December 1, 1984, were 11.9 million, compared with 11.8 million in 1983. Alabama ranked tenth nationally in the production of eggs.

Hatchery Production Up 4 Percent: Commercial hatcheries in Alabama hatched a record 670.5 million chicks in 1984, 26.7 million more than the previous high of 643.8 million chicks hatched in 1983. Egg-type chicks hatched was 11.4 million, compared with 9.9 million in 1983. Broiler-type chicks hatched totaled 659.1 million, 25.2 million more than in 1983. Broiler-type chicks hatched accounted for over 98 percent of the total hatch in the state. Alabama hatcheries shipped 81.3 million broiler-type chicks to other states in 1984, while 15.2 million were shipped into Alabama.

Chicken Production (excluding broilers) Up 10 Percent: Alabama poultrymen produced 15.3 million chicks (excluding broilers) in 1984, compared with 13.9 million in 1983. This phase of the poultry industry largely reflects the production of replacement pullets for laying flocks and production in small farm flocks.

1/ Marketing year: December - November basis. 2/ Hens and pullets of laying age and annual egg production consist of commercial table egg layers, broiler breeders, and farm flocks of 400 birds or less. 3/ Included in other counties in District to avoid disclosure of individual operations.

CASH RECEIPTS REVIEW

1984

Barbara Sanford

Cash Farm Income: Total cash farm income from farm marketings for 1984 increased 12.2 percent from \$2,032,566,000 in 1983 to \$2,279,660,000. Livestock and livestock products, valued at \$1,387.3 million, accounted for 61 percent of the total, while crops totaled \$892.3 million to make up the remaining 39 percent.

Alabama poultry and poultry products accounted for 38.9 percent of the state's total receipts from farm marketings with cattle and calves ranking second with 13.9 percent of the total receipts. Soybeans accounted for 8.4 percent of the total, while peanut receipts totaled 7.3. Cotton lint and cottonseed receipts accounted for 6.2 percent of the total followed by greenhouse and nursery products with 4.4, farm forest products with 4.0, and dairy products with 3.5 percent. Sales from these eight enterprises made up 86.6 percent of the total cash receipts from farm marketings in Alabama.

Receipts from the state's broilers and eggs totaled \$887.6 million in 1984, up \$154.6 million from the 1983 total of \$733.0 million. Cattle and calf returns totaled \$317.5 million, down 7.1 percent from the 1983 total of \$341.9 million.

Receipts from soybeans, peanuts, and cotton accounted for 55.8 percent of the total crop receipts. Combined returns from these crops were up 28.9 percent from 1983.

Cash Receipts Tables: In the county tables, state totals may not add due to rounding, and some data will be included in "Other Counties" to avoid disclosure of individual operations.

PRICES REVIEW

1984

BARBARA N. SANFORD

Prices Received by Farmers: The All Commodity Index of Prices Received by Alabama farmers averaged 573 percent of the 1910-14=100 base in 1984, compared with 541 percent in 1983. This was an increase of 6 percent from 1983 and 11 percent above 1982. Contributing most to the increase were higher livestock prices for hogs, broilers, chickens, and eggs along with higher crop prices for peanuts, oats, and potatoes.

The Livestock and Products Index, one of the components of the All Commodity Index, was 554 percent of the base in 1984, up 5 percent from the 1983 average. Beef cattle averaged \$45.70 per hundredweight (cwt.), down \$1.30 from the 1983 price of \$47.00. The average price for calves was \$54.60 per cwt., down \$2.40 from a year ago. Broilers, at 32.0 cents per pound, were 4.5 cents higher than in 1983. Egg prices, at 71.1 cents per dozen, were 12.5 cents above the previous year's price. Milk sold wholesale by farmers averaged \$14.80 per cwt., equal to the 1983 average price. Hogs averaged \$47.20 per cwt., up 10 cents from 1983.

The other component of the All Commodity Index, the Crop Index, was 612 percent of the base in 1984, 7 percent above the 1983 average. Soybeans averaged \$6.10 per bushel, down \$1.70 from the 1983 price of \$7.80. The corn price averaged \$2.95 per bushel, 60 cents below a year ago. Wheat averaged \$3.25 per bushel, unchanged from the 1983 price. Potatoes at \$7.40 per cwt., compares to \$7.15 a year ago. Peanuts averaged 26.0 cents per pound in 1984, 1.7 cents above the previous years price. The cotton price of 55.9 cents per pound, was 9.8 cents below the 1983 price.

Prices Paid by Farmers: Alabama does not have an Index of Prices Paid by Farmers, therefore, direct comparison between prices paid and prices received cannot be made. The cost of production items increased over a year earlier.

Farmers in the state paid an average of \$225.00 per ton for chick starter in 1984 compared with \$221.00 and \$224.00 in 1983 and 1982, respectively. Broiler grower in 1984 sold for \$236.00 per ton, up from \$222.00 in 1983 and \$216.00 in 1982. Laying feed, at \$213.00 per ton, compares with \$206.00 in 1983 and \$192.00 in 1982. In 1984 the average price for 16 percent protein dairy feed was \$197.00 per ton compared with \$194.00 in 1983. Hog feed, 14-18 percent protein, sold for \$11.50 per cwt., down 10 cents from 1983. Soybean meal, 44 percent protein, averaged \$14.29 per cwt. in 1984 compared with \$14.25 a year ago.
